### IOT

03/2018 – 05/2019

Made IOT solutions for simplicity and trafficless shopping in shopping malls using Sequence diagrams, Use case Diagrams and OSI model. We used to work under BCC&I and Plumule Research.

### Coin Based Prepaid Charger

03/2020 – 04/2020

- I used a Coin Detector and Arduino board to make this project. It detects a coin and provide current as an output upto a particular time interval.

### HOME AUTOMATION

03/2019 – 05/2019

- Made working home Automation model and devices using ESP-8266 node MCU, IFTTT, Adafruit and Google Assistant.

### ELECTROMAGNETIC WAVE DETECTOR

03/2019 – 05/2019

Made this for fun purpose using Arduino as a microcontroller. It detects current flow without even touching the wire.

### NeuraLink Startup site

02/2020 – present

- This is Neuralink a self startup page. Technologies used here is HTML 5, CSS 3, JS, JQuery and Templates. Link - <https://aryarb.github.io/myStartup/>
